Work Experience

WHIM   **Summer 2019 - Present**

Software Engineering Intern   New York, New York

- Finding and creating issues in JIRA
- Actively searching for new bugs, improvements, and features within their web and mobile app
- Taking on bug and improving tickets in JIRA to successively implement features for the development and production stage
- Programming using Javascript/React/Redux/Express/SCSS and Dart/Flutter

Chinese-American Planning Council at P.S.209   **Spring 2018 - March 2019**

Teacher's Assistant   Brooklyn, New York

- Reinforced lessons and assisted the Head Teacher by working with students directly.
- Aided children in understanding the third grade core curriculum with math, english, and science.

Projects

CunyFirst2.0 (github.com/wongjessica/CunyFirst2.0)

- Web application built to replicate features of college's web portal, such as adding and removing classes, adding an option to showcase class overlap, and emailing user their schedule as a PDF.
- Helped reinvent its user interface and user experience with **ReactJS, Redux,** and **CSS.**

Pixelator (github.com/wongjessica/pixelator)

- Web application that allows the user to add columns/rows and to interact with it using their choice of color.
- Accomplished these features using **JavaScript, HTML,** and **CSS.**

Accomplishments

- Administrator of Subtle Asian Tech : Moderates a Facebook group of over 5,000 members, dealing with networking and establishing connections in the tech industry and manages the incoming approval requests from tech people from all across the world.
- Head Programmer and CAD Designer of the Midwood High School Robotics Team: Pink Droyd
